PROFESSIONAL SUMMARY

Software developer with experience building mobile and web applications using Flutter, React, Node.js, and REST APIs. Academic foundation in machine learning, supported by coursework and practical projects using Python, Flask, and scikit-learn. Hands-on experience integrating machine learning, conversational AI, and data visualization into a water-quality assessment application.

EDUCATION

Master of Science in Computational Sciences

Laurentian University

May 2026 - Present

BEng (Hons) Software Engineering

University of Westminster, UK

Jan 2022 - June 2025

- Second Upper Class

WORK EXPERIENCE

Software Developer | Codewaves Pvt Ltd

July 2024 - March 2026

Developed and maintained web applications using React, Node.js, Python, REST APIs, and databases. Designed responsive user interfaces, integrated backend services, fixed technical issues, and collaborated with team members using Git and GitHub.

Mobile Developer | Sri Lanka Telecom

July 2023 - June 2024

Developed mobile application features using Flutter and Dart while integrating REST APIs, forms, authentication, and data management. Tested applications, resolved bugs, and improved performance and overall user experience.

PROJECTS

AquaExpert – AI-Powered Water Quality Assistant

Final Year Project | Python, Flask, scikit-learn, Pandas, Flutter, OpenAI API

- Developed a mobile application integrating machine learning for water-potability assessment with a Python Flask backend.
- Combined conversational AI and data visualizations to help users interpret water-quality information.

SafeDrive – Driver Fatigue Detection System

Software Development Group Project | Computer Vision, Machine Learning, Requirements Analysis

- Collaborated in a five-member team to research and design a smartphone-based driver fatigue detection solution.
- Defined requirements for facial monitoring, fatigue alerts, rest-stop recommendations, and emergency notifications with location sharing.

WavePOS – Point-of-Sale Management System

React, Node.js, Machine Learning, MySQL, REST APIs

- Built responsive interfaces and integrated APIs for sales, inventory, authentication, and employee management.

MySLT – Mobile Application

Flutter, Dart, REST APIs

- Contributed to application development at Sri Lanka Telecom through UI implementation, API integration, and debugging.
